Cabranette
PORCELAIN KITCHEN UNITS
for the Condensed Kitchen

THE LARGER TYPE STANDARD

*Cabranette "BA" and "BB" Units, Illustrated on the Adjoining Pages,
for Use in the Three, Four or Five Room Apartment Kitchens.*

CABRANETTE Porcelain Kitchen Units, when used in combination are designed to meet every kitchen need. Sufficient storage space is provided, so that utensils and provisions, which are ordinarily kept in the pantry, are stored in the more convenient Cabranette, thus eliminating the obsolete pantry. Each unit is of ample size for use in the average apartment or home kitchen. As evidence of this, there are installations of Standard Cabranette Units in 8 room residences and four and five room apartment kitchens. For the one, two, or three room apartments, the Cabranette Alcove Kitchen Units are recommended. These are illustrated on the following pages.

All exterior white surfaces of Cabranette Units are finished in White Vitrified Porcelain Enamel, and stamped from heavy gauge "Armco Ingot Iron." The exterior of the refrigerator is birch, enameled white. Porcelain enamel is the most sanitary and easily cleaned surface known. It is impervious to water, heat, and dirt, and will not chip nor discolor.

Cabranette Units are furnished either to the right or left hand, and are all the same height, 81-inch, which makes possible a great variety of combinations and layouts.

The best results are obtained by first determining which units your plan requires — then lay out your kitchen, taking advantage of the space saving features, compactness and the lay-outs made possible by their use. Using the units, in this way, you will find Cabranette Kitchens are as inexpensive as any other arrangement. It has been proved that Cabranette equipment has been the means of renting apartments and selling buildings.

The services of our organization are available to Architects and Builders for the preparation of drawings and details in connection with the layout of Cabranette equipment in their kitchens.

The "BA" and "BB" Cabranette Units in Detail

Range Unit RAN-BA: A four burner range, with 26-inch top, and

CABRANETTE UNITS—Broom Closet BR-BB, Range Unit RAN-BB, Sink Cabinet CAB-BC, and Refrigerator Unit REF-BA

It may be arranged for automatic refrigeration coils, or with end or rear outside icing door. Package service in upper cabinet with opening at end or rear.

Refrigerator Unit REF-BB: Refrigerator base, identical with REF-BA Unit. Drainboard or porcelain table top. Has no upper cabinet nor tilting bins.

CABRANETTE UNITS — Range Unit RAN-BA, and Broom Closet BR-BB, on one wall. Refrigerator Unit REF-BA, and (24" Sink by Plumber) on the opposite wall.

18-inch oven and broiler. Has pot and pan compartment, cutlery drawer, cutting board, glass bins for flour and sugar, and porcelain work table or Cabranette drainboard top as required. Cabinet above has 10 square feet of shelf area, with removable shelves. Gas and flue connections are always accessible.

Range Unit RAN-BB: Has range section identical with RAN-BA Unit and storage cabinet above contains five square feet of shelf area. One end shelf, 3 inches wide — may be omitted.

Refrigerator Unit REF-BA: Refrigerator base, drainboard or porcelain table top, metal tilting bins for packages, storage cabinet above contains 7 square feet of shelf area. Refrigerator has 75-lb. ice compartment and 7 square feet of shelf area.

Kitchen Cabinet Unit CAB-BA: Porcelain enameled kitchen cabinet, has large table top, two cutting boards, linen drawer, cutlery drawer, pot and pan compartment, bread and cake boxes, metal tilting bins for flour and sugar and packages, and upper cabinet with 10 square feet of shelf area.

Kitchen Cabinet Unit CAB-BB: Identical with cabinet section of RAN-BA. Has pot and pan compartment, cutlery drawer, cutting board, glass bins, drainboard or porcelain table top, and storage cabinet above.

Sink Cabinet Unit CAB-BC: Used above sink between other units. Is 11 inches deep, and 24 inches or 27 inches wide.

Broom Closet Unit BR-BA: Lower section for brooms, storage compartment above.

Broom Closet Unit BR-BB: Similar to one-half of BR-BA. Broom closets are standard with gray sides. White porcelain sides may be furnished

Linen Closet Units LIN-BA and LIN-BB: Similar in dimension to broom closet units but with shelving throughout.

CABRANETTE ALCOVE

For One, Two, or Three Rooms

The Standard 6'-6½" Alcove Kitchen Unit. Range Unit RAN-CA, and Refrigerator Unit REF-CBA.

The Electric 5'-6" Alcove Kitchen Unit.

AN Electric Range in either of the Alcove Kitchen Units does not affect the measurement of the unit in any way, but we suggest in drawing of the electric range required for the power.

The electric units are either the right or left hand side.

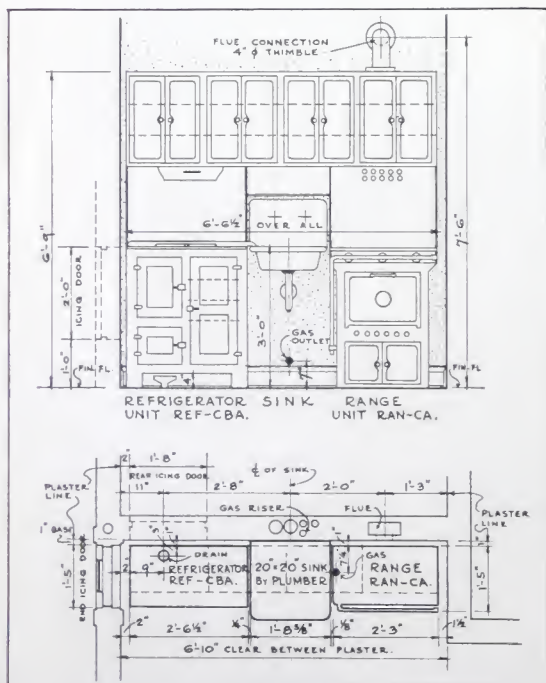

THE 6'-6½" Alcove Kitchen Unit is a complete kitchen. It contains a range, refrigerator, sink, drainboard, and storage cabinets for food-stuff and dishes.

The gas range, RAN-CA, has a three-burner cooking top, and 18" oven and broiler, below which is a pot and pan compartment of ample size.

The refrigerator, REF-CBA, is a three-door 50-lb. capacity, cork insulated box, with five square feet of shelf area.

On top of the refrigerator is a porcelain enameled cast iron drainboard, with a wood cutting board inserted below. A 20" x 20" sink is used with this unit, but is furnished by the plumber. Above the entire unit is a storage cabinet, which contains 19 square feet of shelf space, and is equipped with removable wire mesh shelving. There is a cutlery drawer hung from this upper cabinet, and between the brackets and above the sink is a shelf for soap and cleaning powders. The cabinet above the range forms a vented hood for the stove top.

This unit also is made in two sections, so that the refrigerator unit, with cabinet above, and drainboard top, may be placed on one wall with the sink — then on the opposite or adjacent wall may be placed the range unit with cabinet above. If space permits, a broom closet unit may be used on the same wall with the range unit.

Dimensions of the Standard 6'-6½" Alcove Kitchen Unit.

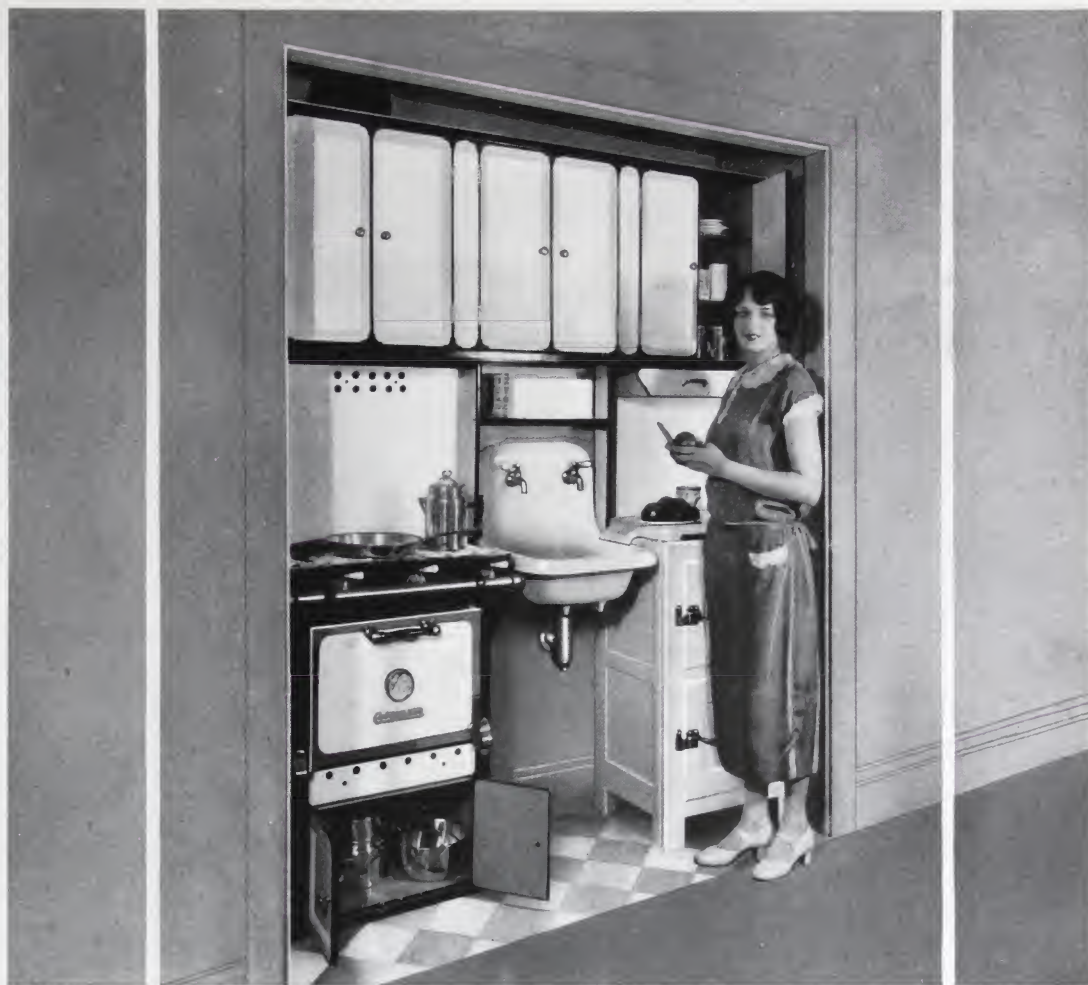

ALCOVE KITCHEN UNITS

Alcove Kitchenette Apartments

Alcove Kitchen Unit.

be substituted for the gas alcove Kitchen Units. This measurements of the unit, in you write us for a roughing-out, which gives all the data and location of outlets. furnished with the range on side of the sink.

The Standard 5'-6½" Alcove Kitchen Unit. Range Unit RAN-CA, and Refrigerator Unit REF-CA.

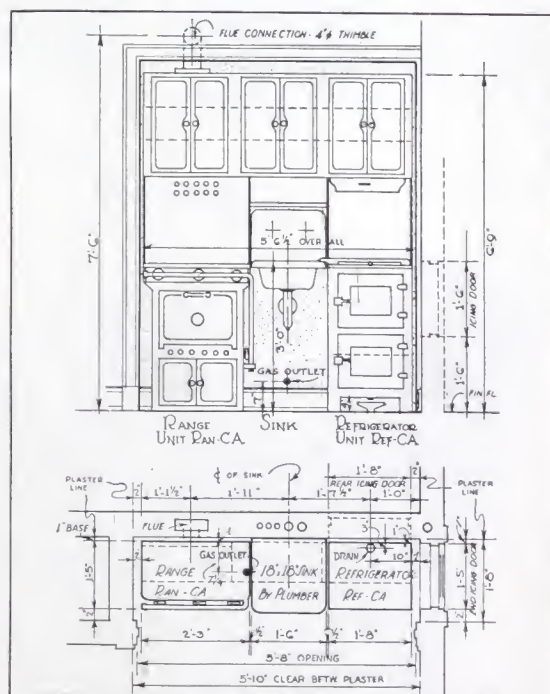

CONTAINED in the 5'-6½" Alcove Kitchen Unit are the same features and utility as the 6'-6½" Alcove Kitchen Unit. From the dimensions shown, it will be found that the range RAN-CA is identical in both units. The refrigerator REF-CA, in this unit, is of the two door type. Its capacity is 35 lbs. of ice, and it has 2½ square feet of shelf area. An 18"x18" sink is used with this unit, but is furnished by the plumber. The cabinet storage compartment above has 16 square feet of shelving and the cutlery drawer and sink shelf are identical with the other alcove unit.

This unit is standard in the one wall layout only, but for use in Bachelor Apartments, the refrigerator section, with table top and storage compartment above, has been furnished.

The Alcove Kitchen Units described on this page are all furnished either right or left hand. Outside icing doors may be used, at either end or rear, and the refrigerators may be equipped for automatic refrigeration.

Package service from the outside can be arranged into the high closet, or onto the drainboard top above the refrigerator, if desired.

Care should be taken to have the sink located as shown, and the dimensions closely followed, as these are figured to a minimum and allowances made for irregularities in the building.

Dimensions of the Standard 5'-6½" Alcove Kitchen Unit.

Cabranette Porcelain Enameled Medicine Cases

Model MED-AA (With Accessory Fixture)
entirely in white

Dimensions and Setting Diagram

Model MED-BB (With Accessory Fixture)
with black corners

THE Cabranette Porcelain Enameled Medicine Case has not only accomplished the ultimate in finish, but has gone one step further and combined with it, individuality and beauty of design.

Heretofore the medicine cabinet has been the only fixture in the bathroom not finished in porcelain — the Cabranette Medicine Case is porcelain enameled throughout. Do not confuse this with baked enamel. Our finish is Vitrified Porcelain Enamel fused on to heavy gauge "Armco Ingot Iron," at 1800° of heat, in electrically controlled furnaces.

Vitrified Porcelain Enamel is the most sanitary and easily cleaned surface known — it will not chip, rust, burn or discolor, and sea air will not deteriorate the finish.

This case is furnished with or without the combination accessory fixture. This fixture contains a tumbler holder, soap dish, and tooth-

brush holder, and is made of cast iron, finished in porcelain enamel, and is secured to the lower flange of the cabinet, from the back, before the cabinet is mounted in the wall.

The Cabranette Medicine Case is made either with the black porcelain enameled corners or entirely in white.

The entire body of the Cabranette Medicine Case is formed from one piece — there are no seams or cracks to collect dirt. All corners and edges are coved, making it easy to clean. These facts, and the porcelain finish, make it the most sanitary bath cabinet obtainable. The door back is in one piece and is free from bolts. To replace the mirror, simply remove the door knob — no tools are required. The removable shelves are also porcelain enameled. The shelf-supports are formed in the body of the cabinet, there being no parts to adjust, get out of order, or become lost.

THIS organization maintains a Plan Service Department which, without obligation, is always at the disposal of Architects and Builders. This department will welcome the opportunity of demonstrating the possibilities of Cabranette equipment in the different kitchen conditions of your plan, or in making suggestions as to which units are best adapted to your various types of apartments.

Cabranette Units, BR-BA and CAB-BA

Cabranette Pantry Unit

THIS Unit, which is a combination of the Kitchen Cabinet CAB-BA and Broom Closet Unit BR-BA, is designed for use in the kitchen of the larger type apartments and homes, where it is either policy or the plan makes it necessary to eliminate the pantry. Ample room will be found in the kitchen cabinet to store all the pots and pans, cutlery, flour and sugar, vegetables, staple foods, and dishes, and the brooms, mops, and scrub bucket are stored in the broom closet.

If space permits, and additional storage room is required, our Storage Unit, LIN-BA, which is identical in appearance and dimensions to the BR-BA Unit, shown in the illustration, may be placed on the opposite side of the kitchen cabinet unit.

Other storage units are made and prices will be quoted on special units, if requested.
